

(NOTE: This is an empty notebook for storing text only notes ... It is designed to take almost no space.) Do you like to plan ahead? Do you like to keep copies of to do and done lists for things that you are preparing for relative to their actual date? This document is simply a searchable calendar for 2016 - not designed the best for scheduling but good for notes on dated activities - perhaps to record to do and done checklists for upcoming events like weddings or parties - perhaps for a sports or obscure event calendar or medical appointment log - or perhaps just an extra calendar for anything that someone else can backup besides you! (Amazon.com) The months are the parking lots. Each day has a designated parking spot. The advantage of having a published document where you can park notes is that its easy to find and the information is stored in your {My Clippings} file - a text file which can be backed up regularly (recommended w/ something like MyClippings_date.txt) on your computer or simply synced with the document if its on your computer. Beware: when you insert notes, you MUST make sure you save them and they are easy to delete and easy to overwrite (but great to have!). When you enter them, remember that the note number will most often show up AFTER the word (dont add notes at the END of the line). YOU want to put your cursor BEFORE the word/symbol and MAKE SURE that no other note is BEHIND the word/symbol (or highlighted word). Its possible to overwrite a note you dont see on the bottom or side of the screen if you dont pay attention to how they get stored. Just pay attention. Cover modification: 3/20/16
