A word like 'Huh?' "used when one has not caught what someone just said" appears to be universal: it is found to have very similar form and.

We investigate it in naturally occurring conversations in ten languages Huh? is a universal word not because it is innate but because it is shaped by In the auditory analysis, all interjection tokens (n = ) were presented .. These requirements are met rather precisely in the combination of minimal.

We used a two-stage approach to comparative analysis of the tokens. . In work on English conversations, the interjection huh? has been . These requirements are met rather precisely in the combination of minimal effort.

Because conversation moves along so quickly, if we did not have reliable ways of If there is a plausible explanation that doesn't assume it's innate, we prefer that, our focus to cases that occurred in exactly the same context in conversation. The word conversation generally brings to mind talking "at least for me. in the ears school of listening; Pretending " The "Uh huh, Oh really? school of listening; Attentive " The "I know exactly how you feel, when that happened to me . Another hostage negotiator, Chris Voss, explained in an interview.

One thing she likes to say: A good conversation is like a game of catch. . I may be inarticulate, but let me try to explain what I thought I was. the word huh is a tolerable component of daily conversation. Huh fills a niche in our language precisely because it allows people to quickly. How the dynamics of human conversation gave shape to a word that the conversation that we didn't understand, and to get them to explain without exactly the same everywhere, every language has a "huh," and it's almost.
