

This book on retirement planning focuses on the non-financial aspects of the transition into retirement. It is a good foundation for the financial planning discussion between advisors and their clients, but it can also be used on its own by anyone who is contemplating retirement or already retired. The book is full of exercises that will help readers gain a better understanding of their own feelings about retirement. This will help prepare them to consider their retirement holistically rather than simply focusing on financial issues. The authors goal was to create an enjoyable, readable and educational experience for those people who want to consider the many issues to think about as they retire.
