

Here is a charming book that combines all the practical information necessary to spin yarn of all types with the folklore and myths of spinning through the ages--such as the Greek woman Arachne who challenged the Goddess Athena to a spinning contest, only to be turned into Nature's best spinner, a spider. The first chapter traces the history of spinning, fully discussing the rich background of the craft, from the first attempts to draw out and twist fibers by hand, to the drop spindle, and then the spinning wheel, which today has been given new significance as a useful and creative object. The next chapters fully show, in step-by-step demonstrations, how to spin with the hand spindle and with the spinning wheel. An additional chapter shows how to build a well-designed but simple spinning wheel. Next the author discusses fiber preparation: how to wash, card, and comb all the different fibers prior to spinning. A separate chapter is given to each of the fiber types: wool and animal hair fibers, all types of vegetable fibers (cotton, flax, jute, etc.), and raising silkworms and spinning silk. The author's instructional text, plus a wealth of photos and line drawings, enables the reader to easily learn to use all the various tools and pieces of spinning equipment, as well as to handle all the different materials. A final chapter on advice for spinners gives the personal experiences of people who have successfully and colorfully devoted themselves to spinning--raising sheep, gathering fleece, spinning yarn, and marketing their products.

Echoing Sacrifice: Traveler, The Singapore Puzzle: 2nd edition, The Strength to Say No, Forms of Local Government: A Handbook on City, County and Regional Options, How To Cheat in Photoshop Elements 12: Release Your Imagination, Defending the Faith, Engaging the Culture: Essays Honoring L.
